Positive Behaviour for Learning

What is Positive Behaviour for Learning (PBL)?
PBL is a proactive school-wide system of support for defining, teaching and supporting appropriate student behaviours to create positive school environments.
PBL establishes the link between research-validated behavioural practices and the environments in which teaching and learning occurs. It improves outcomes for all learners by putting in place sustainable school-wide, classroom and individual systems of support.
PBL also assists teachers to create effective teaching/learning environments where students make the positive behaviour choices that support academic success.

Is PBL for our school?
PBL helps to make schools better places to work and learn. PBL is not a curriculum, it is a process school follow to help build comprehensive, school-wide systems that support academic and behavioural learning for all students.

How will PBL help our school?
PBL establishes systems, practices and a data-aware culture that can maximise benefits of PBL for students, teachers and the community.
PBL promotes positive student behaviour by building the school’s leadership capacity and teachers’ knowledge, understanding and skills in applying effective school-wide behaviour systems.
PBL boosts student engagement in learning by increasing attendance, improving student behaviour and learning as well as broadening student leadership opportunities.
PBL helps school deliver the highest quality learning programs to improve student academic and behavioural learning outcomes.

Our three school rules are;

Be safe
Be respectful
Be a learner
